

Belt Attendance Guide

Parent Edition

Before you request a test, double-check two quick numbers and four stripe sign-offs.

Step 1 · Track Lessons & Attendance

1. Count how many regular classes were offered since the last test cycle.
2. Count how many of those classes your student attended.
3. Attendance % = attended ÷ offered.

These lesson minimums match the printed curriculum packet.

Step 2 · Hit the Numbers

Targets climb from 70% up to 90%—each belt adds a couple of classes plus a small attendance bump.

target = clamp(0.70 + (lessons - 25)/(48 - 25) × 0.20)

Belt	Lessons	Attendance
White	25	70.0%
High White	27	71.7%
Yellow	29	73.5%
High Yellow	31	75.2%
Green	33	77.0%
High Green	35	78.7%
Blue	37	80.4%
High Blue	39	82.2%
Red	42	84.8%
High Red	48	90.0%

Step 3 · Earn All Four Stripes

- Forms / Poomsae
- Self-defense
- Board Breaking
- Sparring

Once lessons, attendance, and stripes are complete, the portal unlocks the Request Test button.

Example

36 classes offered, 31 attended → 86% attendance. That already clears High Yellow (31 lessons / 75.2%), but keep training to reach the Red Belt benchmark of 42 lessons and 84.8% attendance.

Inside the Student Portal

Use the Testing Readiness Tracker to log classes, attendance, and stripe sign-offs. The button to request a test only appears once the tracker says Ready.
